

OpenScape Business S for Private Cloud

An easy deployable All-In-One Voice and Unified Communications solution for SMBs

Take your business to the next level of digital transformation with OpenScape Business S in private cloud deployments scalable for 10, 100 or up to 1500 User. This software-based solution provides greater flexibility, mobility and workforce productivity for small to medium business – all while reducing high operational costs.

OpenScape Business S uniquely simplifies communications through an "All in One" software-based UC Solution. SMB customers receive voice, presence, mobility, collaboration and seamless integration into office and mobile applications in an easy-to-purchase and future-proof deployment model, allowing them to serve their customers better.

OpenScape Business S offers:

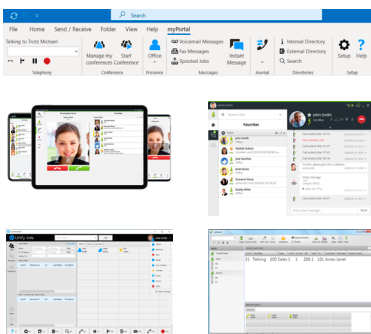

- Integrated voice services, presence management (presence state), Drag&Drop conference, Visual Voicemail (voice boxes), AutoAttendant, Multimedia Contact Center, IM (Instant Messaging), mobility, directory access with database connection, fax, integration in business processes and much more
- UC clients individually matched to the workstation and work processes
- Powerful integration capabilities towards groupware solutions

Deployment Options

OpenScape Business S can be deployed on a standard server (softswitch), hosted in your preferred datacenter, and fully virtualized in the following environments:

- VMware – vSphere
- Microsoft Hyper-V
- Google Cloud Platform (GCP)
- KVM

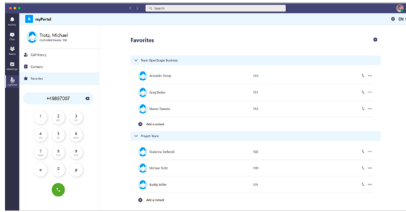

OpenScape Business S can be enhanced with on premise and hybrid OpenScape Business X variants for single and multi-site networks supporting your existing communication interfaces such as IP, Digital, Analog, DECT as well as traditional and SIP-based trunking.

UC clients and telephony devices suitable for any workplace

Select the OpenScape Business UC client or desktop devices that fits your working style:

- myPortal @work – powerful desktop client combining WebRTC VoIP and UC for Windows and macOS
- myPortal for Outlook – providing UC integration into Microsoft Outlook
- myPortal to go – for mobile users combining VoIP and UC on Android and Apple iOS smartphones and tablets
- myAttendant – presence aware switchboard application
- myAgent – powerful contact center client
- Broad range of Desk and Wireless Phones

Cloud-based Integrations

Microsoft Teams

OpenScape Business myPortal for Teams plugin offers telephony and UC services embedded in Microsoft Teams.

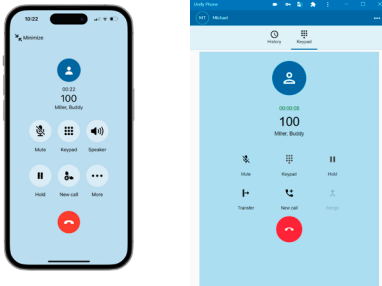

Beside the myPortal for Teams plugin, OpenScape Business offers further interworking options in combination with Microsoft Teams (via Microsoft Direct Routing).

Unify Phone

Unify Phone adds powerful collaboration capabilities from the cloud to your current OpenScape solutions delivering a hybrid-working experience.

Unify Phone for OpenScape - customers looking for an easy-to-use telephony softphone from the cloud connected to OpenScape Business for hybrid and mobile working.

Unify Phone for Unify Video by RingCentral - customers looking to migrate to cloud for messaging and meetings with telephony integration to OpenScape Business platforms providing a great unified user experience.

“OpenScape Business is designed specifically to meet the different communications requirements of today's dynamic small and medium-sized companies.”

Flexible Payment Models

OpenScape Business S offers flexible license options – either permanent or subscription based.

“Pay As You Go” is a flexible OPEX-based payment model based on monthly fees that is offered to our customers in addition to our usual CAPEX payment model. This offering gives customers full flexibility to adjust their communication costs to better meet their needs.

Software Upgrade Entitlement Rights

OpenScape Business provides investment protection and stability with 3 or 5 years of Software Upgrade Entitlement Rights included, ensuring that you always have the ability to upgrade to the latest level of technology innovation for your communication solution.

The all-in-one path to Unified Communications

Deploying UC across small and medium-sized businesses business will accelerate team performance and productivity, increase engagement with customers to increase loyalty, and dramatically reduce communications costs. Accessible from any device, in any location, and at any time, OpenScape Business S delivers the all-in-one path to true Unified Communications on existing networks.

It comes fully packaged, is easy to deploy and support, with flexible licensing options and will grow with the business. And there's no need to rip and replace existing infrastructure because it works on top, seamlessly and efficiently.
